DETAILED ACTION

Claims 1-7 are pending.

Restriction

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-2 and 5, drawn to a triazolopyrimidine of formula I and a composition comprising said triazolopyrimidine of formula I.

Group II, claim 3, drawn to a process for preparing triazolopyrimidine of formula I.

Group III, claim 4, drawn to a dicarbonyl compound of formula III.

Group IV, claim 7, drawn to a method for controlling harmful fungi.

Claim 8 is nonstatutory and will be grouped when applicant amends the claims to conform to US practices.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common

technical feature in all groups is a triazolopyrimidine core. This element cannot be a special technical feature under PCT Rule 13.2 because the element is shown in prior art. US Patent Application 20040157863 teaches triazolopyrimidines which are also used to control fungi in crop protection. The invention of the instant application lacks a special corresponding technical feature and does not make a contribution to the prior art. Therefore, the claims cannot be said to have unity of invention.
